MANAGEMENT&CONTROL

ONLINE TOOL

ShareProject

ShareProject is MTA platform used for communication and documentation exchange with clients. The module for project queries (list of open points – LOP) guarantees fast, transparent communication, monitoring of issues requiring clarifications and advanced reporting. The module for documentation management ensures quick and easy transfer, distribution, navigation, ordering and supervision of documentation and access to documents on every mobile device.

ShareProject is aimed at the increase of communication effectiveness. Communication in the project is fast and clear thanks to a common, user-friendly designed base gathering technical queries issued by all engaged parties. The base is equipped with report generator, notification system and mechanisms for monitoring queries status.

Plan at TOG el +5.060

Drawing GB1036-10ULA-&CLC032-600718

On plan at TOG el. +5.060 is ladder and safety gate. Are they within our scope? If so, we need information on what we can connect the caged ladder and safety gate to.

Katarzyna Salwiak 2019-12-20 08:35

Ja, die genannten Strukturen gehören ebenfalls in Ihrem Leistungsumfang. Bitte sehen Sie sich die markierten Details in den angehängten Plänen an.

Uwe Wittstruck 2020-01-07 11:30

ShareProject

- Fast and easy distribution of project documentation.
- Transfer, distribution, navigation and supervision of documentation.
- Access to project documentation on every mobile device without space or time limitations.

Project document management is a key process in the implementation of any project in the construction industry. The documentation management process consists of distribution and document supervision. The right tool to administer and control the input data and project documentation influences the optimization of the whole investment process. ShareProject guarantees fast transfer, distribution, navigation and supervision of documentation.

Schedule

The platform is provided with a module for creating and managing project schedules both within the project and the project package. The module enables flexible division of the project into project scopes and stages and into tasks together with allocation of resources. The tool supports the planning of the implementation and supervision over its course, allows for quick, clear and logical scheduling and monitoring of the work progress.
